

Rules for Laboratory

1. There will be 6 assignments to deliver during the laboratory.
2. A grade will be given for each assignment. The grades are between 0 and 10 + bonus points if there are any for the assignment.
3. The grade of the assignment will reflect not only if the assignment is completed but, also, if the student is able to explain the code and the logic of the solution.
4. Assignments can be presented late, but only by one laboratory session (i.e. at most 2 weeks late). The penalty for a late laboratory is -2 points.
5. Assignments must be presented in person during the laboratory with one's one subgroup. Assignments **cannot** be presented by email or during another subgroup's laboratory or by other means.
6. The final lab grade is the arithmetic mean of the 6 grades received for the assignments.
7. **The final lab grade must be ≥ 5 to enter the normal examination session.** If less than 5 you will be able to enter only in the retake examination session.
8. The final lab grade is 40% of the final grade.
9. Attendance is mandatory. You need 6 out of 7 attendances at the lab, **otherwise you cannot take the examination at all** (i.e. you fail the course by default).
